

Sciformatix Corporation and E&K Scientific Announce Partnership

LOS GATOS, CA – February 5, 2009 – Sciformatix Corporation, a pioneer in Laboratory Information Management Systems (LIMS) delivered via the Software-as-a-Service (SaaS) model, today announced that the company has entered into a partnership with E&K Scientific, the premier provider of laboratory supplies and instrumentation to academic, biotech and pharmaceutical research laboratories. Under terms of the agreement, E&K Scientific will act as a distributor and reseller of Sciformatix SciLIMS products throughout California.

The agreement accelerates the Sciformatix entry into these important markets while rounding out the E&K product line. E&K will provide the Sciformatix SciLIMS solutions – which help small and mid-size labs manage their samples and storage in a professional yet affordable manner – to their customer base of regional and multinational organizations across life sciences industries.

“In our customer base we have seen a huge need for people to find a way to get control over their samples and storage in a less labor-intensive way,” explained Brian Ruf, CEO of E&K Scientific. “This is the first software product we have ever sold in our 35-year history, but it has proven to be an extremely easy addition to our catalog. Since it is SaaS-based, there is no hardware or infrastructure for us – or our customers – to worry about. And the product is extremely easy to demonstrate and use.”

“The market has exhibited strong interest in a SaaS-based laboratory information management solution,” said Thomas Kent, President and CEO of Sciformatix. “SciLIMS is the first-ever easily-tailorable LIMS that is delivered on-demand, so the value we bring maps well into the E&K focus. Our first product is SciLIMS Samples & Storage Management (SSM), which addresses the most pervasive need of labs around the world. And we are delighted to sign E&K as our first strategic partner, helping us bring this important solution to small and medium-sized labs.”

The SciLIMS SSM solution is available in limited distribution through the end of February 2009 when it will be available for general distribution. The product is priced aggressively, based upon monthly per user subscriptions. Prices for the SciLIMS SSM solution start as low as \$50 per month for each user in a starter solution. Lab group and professional editions are also available, providing increased features and higher subscription fees.

About Sciformatix Corporation

Sciformatix Corporation (www.sciformatix.com) is a pioneer in SaaS-based LIMS solutions to healthcare, biotech, chemical, environmental, and other disciplines. A privately-held startup, Sciformatix' mission is to provide scientific labs with advanced, affordable and easily deployed Scientific Information Management Systems, supporting dynamic and evolving processes. The company is led by a seasoned management team with strong domain expertise in the area of scientific laboratory information systems. The company's breakthrough products include SciLIMS Samples & Storage Management, a Laboratory Information Management System aimed at small to medium laboratories, where cost and implementation time are critical.

About E&K Scientific

E&K Scientific Products (www.eandkscientific.com) offers over 29 years of experience as a premier provider of laboratory supplies and instrumentation to the Academic, Biotech and Pharmaceutical Research Laboratories. We are a family-owned and operated business bringing dependability and consistency to our customers. We work diligently with our manufacturers to ensure quality, value and availability of the latest innovative products.
