

SciLIMS Samples Editions Get a Handle on Samples...Easily

SciLIMS, from SciFormatix, delivers a host of benefits, including reduced operating costs and enhanced throughput, improved utilization of valuable sample material (along with reagents and other materials), elimination of burdens on IT and software engineering, increased compliance without complications, and other benefits. And, what if you and your lab would like to ease into SciLIMS, improving the management of your samples without painting yourself into a corner?

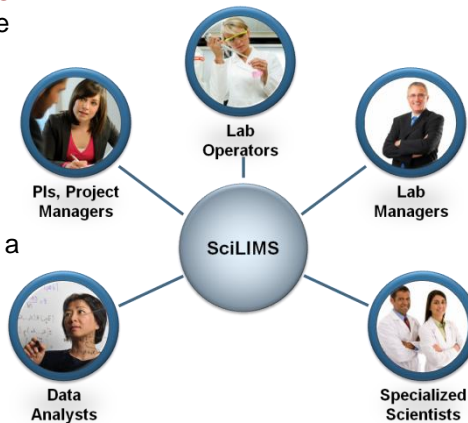

SciLIMS “Samples Editions” may be the answer for you.

Easily Tailor Details for Your Samples

With advanced capabilities you won't find anywhere else, SciLIMS Samples Editions allow you to easily tailor the details for your samples and other “subjects of interest”, creating the types of samples pertinent to your lab, along with the properties to be captured and tracked. It's easier than setting up Excel spreadsheets! And, you won't require expensive and time-consuming customization and software development services.

Single-User or Team Collaboration

You can use SciLIMS as a solution for one individual, or put it to use for an entire team that desires to collaborate and share information. A central database for your lab allows all designated stakeholders to work together in contributing, sharing, and benefitting from a common and consistent set of information across projects and processes. This enables lab professionals, lab managers, scientists, data analysts, principal investigators, project managers, and others to collaborate, with real-time operations and multi-user access.

Find Information About Any Sample, with Any Criteria

SciLIMS Samples Editions allow you to easily and quickly find information about any samples and with the use of any search criteria. Try that with your current tools if your lab has data spread across Excel spreadsheets, in paper-based notebooks, and/or residing in other informal tools – it's probably impossible.

Exchange Data with Other Processes

Need to exchange data with other tools and processes? No problem. SciLIMS Samples Editions allow quick and easy data exporting, enabling you to feed the data to other processes and applications. And, the Samples Edition regular version provides importing of data to streamline samples entry/update operations and receive data from other processes.

SciLIMS Samples Editions – get started in the right direction!

- » **CAPABLE**
Solves tough problems with ease
- » **FAST**
Faster than setting up spreadsheets
- » **EASY**
Designed for lab professionals, and no burden to IT
- » **FLEXIBLE**
Puts control and tailorability in your hands
- » **SECURE**
Secure data management & communications
- » **ECONOMICAL**
Affordable by labs of any size

Choose the Samples Edition That Meets Your Needs

SciLIMS offers Samples Edition in two different versions: “Samples Edition” and “Samples Edition Lite”. Both offer professional features for expertly managing your samples information and the “Lite” version provides a subset of the features in the regular version.

Feature Area	Samples Edition Lite	Samples Edition
User Limit	3 Users	Unlimited
Maximum Sample Types	5	10
Maximum Custom Properties	10	30
Advanced Search Tools for Samples	✓	✓
Sample Set Management	✓	✓
Samples Data Exchange (Export)	✓	✓
Samples Data Exchange (Import)		✓

Basic Container and Storage Management

The SciLIMS Samples Editions can even be used for basic container and storage management, through the use of custom properties. For professional container and storage management, the SciLIMS Advanced Editions are ready to meet your needs.

Upgrade Seamlessly When Ready

If you get started with a SciLIMS Samples Edition and determine that you need features provided by a SciLIMS Advanced Edition, you’ll have no worries, no hassles. You can seamlessly upgrade to an Advanced Edition with no data migration required and no downtime for your lab. This gives you the peace of mind to get your lab started on the right path, even if your initial focus is purely on the features provided by SciLIMS Samples Edition.

Get Started Today – Get Results Today!

Are you ready to propel your lab to new heights? Contact your SciLIMS representative, or contact Sciformatix directly (www.sciformatix.com) to get started with SciLIMS today, get results today, and achieve lasting value.
