

Sciformatix Announces Availability of Professional SaaS-based LIMS, Money-Back Guarantee

Los Gatos, CA – November 11, 2009 – [Sciformatix Corporation](#), a pioneer in Software-as-a-Service (SaaS) Laboratory Information Management Systems (LIMS) for scientific labs, today announced the availability of its [SciLIMS](#) Samples and Storage Management (SSM): Professional Edition. The SciLIMS SSM Professional Edition provides a professional solution that will accommodate small labs, emerging growth labs, and larger labs.

“Every lab manages important information about their samples, or ‘subjects of interest’, and most labs use informal tools such as paper-based notebooks, Microsoft Excel, or tracking systems cobbled together from disparate tools”, said Sciformatix CEO Thomas Kent. “SciLIMS, with its unparalleled ease-of-use and prices starting as low as [\\$149/month](#), will dramatically improve a lab’s operations and reduce operating costs, given a comprehensive set of capabilities not found in any other LIMS solution.”

The popularity of cloud computing and SaaS-based LIMS is growing. In a recent LIMS study, the ARC Advisory Group, states “SaaS alleviates the customer's need to purchase servers, maintain software, and other ongoing support, enabling them to concentrate on core capabilities. Due to the installed cost of a traditional LIMS solution, it is easy to understand why users would be attracted to [the SaaS] model.”

The new SciLIMS Professional Edition erases limits in many areas (users, container types, storage units, etc.) and raises the bar for other parameters (up to 1 million active samples). Extensive security measures surrounding data management and user access ensure enterprise-class security for SciLIMS customers, whether a lab operates in a single facility or across multiple locations. Its tailorability allows lab professionals to easily customize SciLIMS to the lab’s requirements, without costly customization or system administration services.

Sciformatix also announced a [30-day money back guarantee](#). “This provides a risk-free opportunity for customers to try SciLIMS and explore its many features and benefits”, said Kent.

The SciLIMS SSM Professional Edition is available immediately. A subscription to SciLIMS can be ordered via the Sciformatix web site (www.sciformatix.com).

About Sciformatix Corporation

Sciformatix Corporation (www.sciformatix.com) is a pioneer in SaaS-based LIMS solutions to scientific labs among all disciplines. An emerging growth company led by seasoned management with strong domain expertise, Sciformatix’ mission is to provide

scientific labs with user-tailorable, affordable, and easily deployed Laboratory Information Management Systems, supporting dynamic and evolving processes.
